

**SRCC FEE SCHEDULE**  
**July 2008**

**ANNUAL FEES**

Paid by all SRCC suppliers (entity holding certification). Failure to pay any fee or submit any report by the due date shall warrant immediate suspension of all certifications issued to the supplier. These certifications may be reinstated by payment of all delinquent fees, plus a reinstatement fee of \$500, within 30 days of the original due date. Any certifications not reinstated within this time period must begin the certification process from the beginning, including payment of current application fees and all delinquent fees.

**Annual Program Fee**

**\$750 or \$1000**

SRCC maintains two certification programs (OG100 and OG300). The annual cost to participate in any of the two is \$750. To participate in both programs is \$1000. The Annual Program Fee is required when the certification goes into effect and on each anniversary date.

**License & Certification Maintenance Fee  
(per net aperture area of collectors shipped)**

**\$ 0.0067 or \$ 0.02 per ft<sup>2</sup>**

The supplier will be billed on a quarterly basis for the use of the SRCC Rating and Certification. Collectors are divided into two classes and each class has a separate fee:

1. Unglazed collectors: \$ 0.0067 per ft<sup>2</sup> of each certified and rated collector shipped, whether sold as a collector only or part of a system. Fee is capped at \$3,350 (500,000 ft<sup>2</sup>).
2. Glazed collectors: \$ 0.02 per ft<sup>2</sup> (aperture area) of each certified and rated collector shipped whether sold as a collector only or part of a system.

**APPLICATION FEES**

The following application fees are a one-time charge for each application.

**OG100**

**\$500/\$100 or \$100/\$50**

Each supplier will be charged \$500 per collector certification application that requires full processing. Any application that requires partial processing, for example, a "similar model," will be charged \$100 for processing.

For applications for private labeling, each application that requires full processing will be charged \$100. Private label applications for "similar models" will be charged \$50 per collector application.

**OG300**

**\$1750/\$750/\$100 or \$500**

**\$1,750 Supplier Setup Fee.** Each supplier will be charged a one-time fee for its first basic system application.

**\$750** for each additional basic system that requires a Design Review Team review.

**\$100** for each basic system, similar model system or special similar model system that does not require a Design Review Team review.

**\$500** Private Label Setup Fee for any supplier that uses exclusively systems that have been certified by another supplier, plus \$100 per system certified. If anything is changed in the original manual(s) other than the company name and model number(s), an additional fee of \$500 will be charged.

## **CHANGE FEES**

**\$250** to change a Participant's address

**\$500** plus \$20 per collector and system to change company name, brand name, and/or model numbers.

## **DEFINITIONS**

**Basic System:** A system with a specified plumbing arrangement and control system as defined by the supplier with a unique model number. The solar collection components must be certified under OG100 or undergo the SRCC system test.

**Similar Model System:** A system with the identical plumbing arrangement and control system as a basic system but with different sized components for the purpose of satisfying a different load, e.g., larger collector area and increased solar storage capacity.

**Special Similar Model System:** A system with the identical plumbing arrangement and control system as the basic system with the exception that a component has been changed which may cause the SDHW system to give a different but easily calculable performance. The substituted components cannot require substantive changes in the Installation and Operation & Maintenance manuals.

**Private Label System:** A basic system and similar model systems as certified by a supplier that are sold by another supplier who is a licensee/private labeler of the first supplier. The licensee supplier may make no changes to any part of the first supplier's certification except for name and model changes. The licensee supplier must agree to all conditions in the certification agreement as the first supplier.
