

**Solar Rating & Certification Corporation™**  
*The Industry Standard Since 1980.*

## Press Release

---

**Cocoa, FL, January 31, 2013** - The Solar Rating and Certification Corporation™ (SRCC™) announces three new valuable services designed to provide program participants unmatched efficiency for their SRCC OG-100 (collectors) and SRCC OG-300 (systems) certification needs.

The SRCC was incorporated in 1980 as a non-profit, independent, third-party certification body. The SRCC provides authoritative performance ratings, certifications and standards for solar thermal products, offers expert recommendations and advice to governments and other entities, as well as guidance and protection for consumers and stakeholders. They help promote the development of reliable solar thermal technologies, and accountability for performance claims. Always paving paths to excellence, SRCC proudly announces the following services:

**SRCC's OG-300® Modeling Service™** This new service provides SRCC participants with an understanding of what their system ratings will look like if they are considering making changes to their existing SRCC OG-300 certified systems. Participants may provide variations using the SRCC Simulations Input Data Sheet and SRCC will provide ratings that include SF and SEF daily and four annual SF and SEF (One high solar radiation Phoenix, AZ, one low solar radiation Madison, WI, and the participant may choose two additional cities) SRCC participants can look forward to receiving an e-mail in early February detailing the three easy steps it takes to get modeling results within five business days.

**SRCC's Tank Information Listing Service (TILS™)** SRCC announces TILS as continuous improvement to the certification process. Manufacturers applying for SRCC OG-300 Certification (systems) will have access to a list of tanks which have already been tested in accordance with SRCC™ *TM-1 Solar Domestic Hot Water System and Component Test Protocols*, one of the requirements for attaining SRCC OG-300 Certification. This service provides applicants with a decision making tool that may not only speed-up the certification process, but also save valuable time, money, and resources by bypassing the tank testing phase.

**SRCC's Certification Ratings Information Service (CRIS™)** The **Certification Ratings Information Service** will provide subscribers with up-to-date information. Understanding their business partners' time is valuable, it is SRCC's goal to save them the effort it takes to research changes in the status of SRCC certifications. Subscription includes the detailed data for SRCC certified collectors and systems available 24/7, a secure portal upon login, reliable customer service during SRCC's office hours, and real-time status notification of certification status changes.

For further details regarding any of these new services, contact SRCC by e-mail: [SRCC@solar-rating.org](mailto:SRCC@solar-rating.org) or visit [www.solar-rating.org](http://www.solar-rating.org)
