THE NEW SRCC™

A Pioneer Makes Great Strides Amidst A Rapidly Expanding Market

COCOA, FL, April 13, 2011—The Solar Rating & Certification Corporation (SRCC) is the leading non-profit, independent, third-party certification entity for solar hot water collectors & systems. SRCC has seen an explosion in demand for its services, and has restructured and streamlined its operations.

“Manufacturers will continue to benefit from our reputable standards and independent testing. But now, they will also enjoy premier service, and faster, more responsive turnaround, while receiving the same scientifically reliable results that have made the SRCC the go-to organization in the solar thermal industry,” said Eileen Prado, Executive Director of the SRCC.

Some improvements include: The addition of many new accredited test labs worldwide (with a focus on North American labs to reduce shipping costs and lead times), the increase of qualified staff members to expedite certification reviews and reduce application process times, and the development of new standards and programs. Web-based application tracking capabilities are also being implemented.

ABOUT THE SRCC

The SRCC was incorporated in 1980 as a non-profit, independent, third-party certification entity. The SRCC provides authoritative performance ratings, certifications and standards for solar thermal products, offers expert recommendations and advice to governments and other entities, as well as guidance and protection for consumers and stakeholders. They help promote the development of reliable solar thermal technologies and accountable performance claims.
