## **ICC-SRCC unveils an exclusive digital code linkage feature for solar water heating clients**

*This new feature will increase the visibility, awareness and ease-of use of ICC-SRCC listings*

**Brea, Calif.** – The Solar Rating & Certification Corporation (ICC-SRCC), a program of the ICC Evaluation Service (ICC-ES), is expanding its solar water heating client offerings to include an exclusive new online code linkage feature. This feature will increase the visibility, awareness and ease-of use of listings by linking the International Code Council’s widely used, online code portals, [publicACCESS](#) and [premiumACCESS](#), to client listings.

The publicACCESS and premiumACCESS portals provide online access to the International Codes (I-Codes), a coordinated, modern, efficient set of building codes used in all 50 U.S. states and many other countries. Specifiers, engineers and code officials use these digital code websites on a regular basis to specify products or approve products for installation. Users accessed these two sites over 4.5 million times in 2017.

Denoted by a green ICC-ES symbol, the links allow users to see a list of compliant solar thermal equipment and directly access the applicable listings on the ICC-SRCC website. As a member of the ICC Family of Companies, ICC-ES is the only entity that can offer this unique feature.

Designed specifically for solar heating and cooling manufacturers by industry experts, the [ICC-SRCC listing program](#) saves manufacturers time and money, facilitates quicker and more accurate installations of solar thermal products, and provides high-quality listing information that code officials need to enforce the codes. ICC-SRCC listings show manufacturer compliance to all codes applicable to solar thermal equipment and components throughout the U.S.

“We are confident that this new feature of our listing program will make SRCC listing information easier to access and increase the visibility of this technology,” said ICC-SRCC Director Shawn Martin. “This program truly makes ICC-SRCC a one-stop shop for all of the certification and listing needs of the solar thermal industry.”

For the full directory of ICC-SRCC’s solar thermal listings and to learn more about the program, [click here](#).

###

### **About the International Code Council**

The [International Code Council](#) is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets [choose the International Codes](#).

### **About ICC-ES**

The [ICC Evaluation Service](#) (ICC-ES), a member of the ICC Family of Companies, is a nonprofit, limited liability company that does technical evaluations of building products, components, methods and materials. ICC-ES [evaluation reports](#), [building product listings](#) and [plumbing, mechanical and fuel gas](#), and [solar thermal product listings](#) provide evidence that products and systems meet requirements of codes and technical standards.

### **About ICC-SRCC**

The [Solar Rating & Certification Corporation](#) (ICC-SRCC) is a program of the [ICC Evaluation Service](#) (ICC-ES), a member of the [ICC Family of Companies](#). ICC-SRCC provides authoritative performance ratings, certifications and standards for renewable energy products.
